

Data Sheet

# Strainer Type **FIA**

Reliable filtration up to 65 bar

FIA strainers are a range of angleway and straightway strainers, which are carefully designed to give favourable flow conditions. The design makes the strainer easy to install, and ensures quick strainer inspection and cleaning.

FIA strainers are used ahead of automatic controls, pumps, compressors etc., for initial plant start-up and where permanent filtration of the refrigerant is required. The strainer reduces the risk of undesirable system breakdowns and reduces wear and tear on plant components.

FIA strainers are equipped with a screen mesh of stainless steel, available in sizes 100, 150, 250 and 500 $\mu$  (microns\*), (US 150, 100, 72, 38 mesh\*).

\* Mesh is the number of threads per inch.  $\mu$  (microns) is the distance between two threads ( $1\mu = 1/1000$  mm).

### Features

- Modular Concept:
  - Each valve housing is available with DIN and ANSI butt weld connection and in several different sizes.
  - Possible to convert FIA strainers to any other product in the SVL family (Shut-off valve, regulating valve, check & stop valve or check valve) just by replacing the complete top part.
- Quick and easy maintenance. Replacement of top part does not require welding.
- Filter net of stainless steel mounted direct without extra gaskets means easy servicing.
- Two types of strainer inserts are available:
  - A plain insert made of stainless steel.
  - A pleated insert (DN 15-200) with extra large surface, which ensures long intervals between cleaning and low pressure drop.
- FIA 15-40 (½ – 1 ½ in.):  
A special insert (50µ) can be used in combination with a standard version when cleaning a plant during commissioning.
- FIA 50-200 (2 - 8 in.):  
A large capacity filter bag (50µ) can be inserted for cleaning plant during commissioning.
- FIA 65-200 (2½ - 8 in.) can be equipped with a magnetic insert for detention of iron particles and other magnetic particles.
- Each strainer clearly marked with type, size and performance range
- Housing and bonnet of low temperature steel in accordance with the requirements of the Pressure Equipment Directive and those of other international classification authorities
- Classification: DNV, CRN, BV, EAC etc. To get an updated list of certification on the products please contact your local Danfoss Sales Company.
- Equipped with 42CrMo4 bolts to withstand high pressure.

## Media

### **Refrigerants**

Applicable to HCFC, HFC, R717 (Ammonia), R744 (CO<sub>2</sub>) and flammable refrigerants.

For further information refer to the product instruction for FIA.

### **New refrigerants**

Danfoss products are continually evaluated for use with new refrigerants depending on market requirements.

When a refrigerant is approved for use by Danfoss, it is added to the relevant portfolio, and the R number of the refrigerant (e.g. R513A) will be added to the technical data of the code number. Therefore, products for specific refrigerants are best checked at [store.danfoss.com/en/](https://store.danfoss.com/en/), or by contacting your local Danfoss representative.

## Design

### Strainer Insert

A filter grid and filter net of stainless steel ensure long element life. The filter net offers a very high degree of cleanability.

### Housing

The strainer housing is made of special, cold resistant steel.

### Installation/Maintenance

The strainer is designed to resist high internal pressures. However, the piping system in general should be designed to avoid liquid traps and reduce the risk of hydraulic pressure caused by thermal expansion.

Install the strainer with the cover in downward position.

Danfoss recommends replacement/cleaning of the strainer when the differential pressure loss >0.5 bar (7.3 psi) in the liquid line and >0.05 bar (0.7 psi) in the suction line. The max. permissible differential pressure is 1 bar (15 psi).

For further information refer to installation instruction for FIA.

**Figure 5: Example of marking ring, FIA**

## Selection of strainer size

The mesh aperture size of the strainer must satisfy the requirements stated by the suppliers of the equipment to be protected.

The following recommendations of aperture size apply in general to refrigeration installations:

## Strainer, type FIA

**Table 7: All lines**

First start up: (Use strainer element with removable insert for FIA DN15-40 or separate filter bag for FIA DN 50-200. 50µ insert should normally be removed after the first 24 hours of operation)	50µ
---	-----

**Table 8: Liquid Lines**

Ahead of pumps:	500µ [38 mesh]
After pumps:	150µ [100 mesh] / 250µ [72 mesh]
In front of AKVA valves:	100µ [150 mesh]

**Table 9: Protection of automatic regulation equipment**

Generally	150µ [100 mesh] / 250µ [72 mesh]
Sensitive equipment, e.g. suction regulators with low temperature	250µ [72 mesh]

**Table 10: Suction Lines**

Ahead of screw compressor	250µ [72 mesh]
Ahead of piston compressor	150µ [100 mesh]

**NOTE:**

Mesh is the number of threads per inch. µ (microns) is the distance between two threads (1µ = 1 /1000 mm).

	in.	18.27	18.31	23.82	10.87	4.61	11.02	209 lbs

**NOTE:**

Specified weights are approximate values only.

## Ordering

The table below is used to identify the strainer required. Please note that you have to order **FIA strainer without insert, a strainer insert and accessories**.

**Example:**

FIA 150 D ANG + FIA 150 150µ Strainer insert + Filter Bag = **148B6669+ 148H3134 + 148H3155**

- **ANG** = Angleway
- **STR** = Straightway
- **D** = Butt-weld DIN
- **A** = Butt-weld ANSI

**Table 20: Butt-weld DIN (EN 10220) - Angleway**

Size		Type	FIA Without Strainer insert	Strainer insert	Strainer insert	Strainer insert	Strainer insert	Pleated Strainer insert	Pleated Strainer insert	Pleated Strainer insert
mm	in			100µ 150 mesh	150µ 100 mesh	250µ 72 mesh	500µ 38 mesh	150µ 100 mesh	250µ 72 mesh	500µ 38 mesh
150	6	FIA 150 D ANG	148B6669	-	148H3134	148H3142	148H3148	148H3226	148H3293 <sup>(1)</sup>	-
200	8	FIA 200 D ANG	148B6677	-	148H3135	148H3143	148H3149	148H3297	148H3294 <sup>(1)</sup>	-

**Table 21: Butt-weld DIN (EN 10220) - Straightway**

### Ordering FIA strainers from the parts programme

Please note that you have to order **Strainer housing, complete top part, a strainer insert and accessories**.

**Example:** Stainer housing, FIA 50 D ANG **148B6627**, refer [Table 24](#): FIA strainer valve housings with different connections.

Complete top part, FIA 50 **148B5785** Strainer insert, 100µ 150mesh **148H3157** refer [Table 25](#):FIA complete top parts (including gaskets and bolts) and strainer inserts.

Filter Bag, FIA 50 **148H3150** refer [Table 26](#): Accessories

**Table 24: FIA strainer valve housings with different connections**

Size		Housing SVL 65 bar							
		DIN-Butt weld		ANSI-Butt weld		SD-Soldering		SA-Soldering	
		ANG	STR	ANG	STR	ANG	STR	ANG	STR
15	½	148B6622	148B6642	148B6612	148B6632	148B6724	148B6745	148B6713	148B6734
20	¾	148B6623	148B6643	148B6613	148B6633	148B6725	148B6746	148B6714	148B6735

## Certificates, declarations, and approvals

The list contains all certificates, declarations, and approvals for this product type. Individual code number may have some or all of these approvals, and certain local approvals may not appear on the list.

Some approvals may change over time. You can check the most current status at [danfoss.com](http://danfoss.com) or contact your local Danfoss representative if you have any questions.

## Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

### The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at [store.danfoss.com](https://store.danfoss.com).

### Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at [www.danfoss.com/en/service-and-support/documentation](https://www.danfoss.com/en/service-and-support/documentation).

### Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at [www.danfoss.com/en/service-and-support/learning](https://www.danfoss.com/en/service-and-support/learning).

### Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: [www.danfoss.com/en/choose-region](https://www.danfoss.com/en/choose-region).

### Spare Parts

Get access to the Danfoss spare parts and service kit catalog right from your smartphone. The app contains a wide range of components for air conditioning and refrigeration applications, such as valves, strainers, pressure switches, and sensors.

Download the Spare Parts app for free at [www.danfoss.com/en/service-and-support/downloads](https://www.danfoss.com/en/service-and-support/downloads).

### Coolselector®2 - find the best components for you HVAC/R system

Coolselector®2 makes it easy for engineers, consultants, and designers to find and order the best components for refrigeration and air conditioning systems. Run calculations based on your operating conditions and then choose the best setup for your system design.

Download Coolselector®2 for free at [coolselector.danfoss.com](https://coolselector.danfoss.com).
