

Data Sheet

Shut-off valve
Type **SVA-S** and **SVA-L**

With butt-weld connection F

Designed to meet all industrial refrigeration application requirements

SVA shut-off valves are available in angleway and straightway versions and with Standard neck (SVA-S) and Long neck (SVA-L).

The shut-off valves are designed to meet all industrial refrigeration application requirements and are designed to give favourable flow characteristics and are easy to dismantle and repair when necessary.

The valve cone is designed to ensure perfect closing and withstand a high system pulsation and vibration, which can be present specifically in the discharge line.

Features

- Modular Concept:
 - Each valve housing is available with butt-weld F connection and with several different sizes
 - Possible to convert SVA-S or SVA-L to any other product in the Flexline™ SVL family (regulating valve, check & stop valve, check valve or strainer) just by replacing the complete top part
- Fast and easy valve overhaul service. It is easy to replace the top part and no welding is needed
- Optional accessories:
 - Heavy duty industrial hand wheel for frequent operation
 - Cap for infrequent operation
- Available in angleway and straightway versions with Standard neck or Long neck (DN 15 to DN 40) for insulated systems
- Each valve type is clearly marked with type, size and performance range
- The valves and caps are prepared for sealing, to prevent operation by unauthorized persons, using a seal wire
- Internal metal backseating:
 - DN 15-65 (1/2-2 1/2 in.)
- Internal PTFE backseating:
 - DN 80-200 (3-8 in.)
- Can accept flow in both directions
- Housing and bonnet material is low temperature steel according to requirements of the Pressure Equipment Directive and other international classification authorities
- Equipped with stainless steel bolts
- Classification: DNV, CRN, BV, EAC etc. To get an updated list of certification on the products please contact your [local Danfoss Sales Company](#)

Media

Refrigerants

For natural refrigerants (Ammonia, CO₂) and non-corrosive gases and liquids acc. to EN 378-1 and for brine.

New refrigerants

Danfoss products are continually evaluated for use with new refrigerants depending on market requirements.

When a refrigerant is approved for use by Danfoss, it is added to the relevant portfolio, and the R number of the refrigerant (e.g. R513A) will be added to the technical data of the code number. Therefore, products for specific refrigerants are best checked at store.danfoss.com/en/, or by contacting your local Danfoss representative.

Product specification

Pressure and temperature data

Table 1: Pressure and temperature range

Features	Description
Temperature range	-60 °C/+150 °C (-76 °F /+302 °F)
Max. working pressure	52 bar (754 psig) for DN15 to DN 125 25 bar (362 psig) for DN 150 to DN 200

For more detail on pressure and temperature range; please see below.

Figure 1: Pressure/Temperature range chart for SVL product range with butt-weld connection F

For valve sizes DN 15 to DN 50 and DN 80:

52 bar (754 psig) at -60 °C to +150 °C (-76 °F to +302 °F).

For valve sizes DN 65 and DN100:

52 bar (754 psig) at -60 °C to +100 °C (-76 °F to +212 °F),
45 bar (652 psig) at +100 °C to +150 °C (+212 °F to +302 °F).

For valve size DN 125:

52 bar (754 psig) at -40 °C to +50 °C (-40 °F to +122 °F)
43 bar (623 psig) at -60 °C to -40 °C (-76 °F to -40 °F),
42 bar (609 psig) at +50 °C to +100 °C (+122 °F to +212 °F),
36 bar (522 psig) at +100 °C to +150 °C (+212 °F to +302 °F).

For valve size DN 150:

25 bar (362 psig) at -60 °C to +150 °C (-76 °F to +302 °F).

For valve size DN 200:

25 bar (362 psig) at -60 °C to +100 °C (-76 °F to +212 °F),
23 bar (333 psig) at +100 °C to +150 °C (+212 °F to +302 °F).

SVL housings with other connection types (DIN, ANSI, SOC and thread) are approved for a maximum working pressure of 52 bar (754 psi g) at -60 °C to +150 °C (-76 °F to +302 °F) for all sizes.

The reduced pressure in some of the SVL housings with connection type F is caused by the welding onto stainless steel pipes with reduced pipe size.

Connections

Table 2: F - connection

100	4	116.3	2	4.579	0.118	313	278	363	323
125	5	141.7	2	5.579	0.118	514	470	596	545
150	6	170.3	2	6.705	0.118	785	597	911	693
200	8	221.1	2	8.705	0.118	1168	1024	1355	1188

Connection:

- Butt-weld connection "F"
 - DN 15 to 65 size: 2 mm thick
 - DN 80 -200 size: 3 mm thick

Design

Housing

Made of special, cold resistant steel

Valve cone

The valve cone can be turned on the spindle, thus there will be no friction between the cone and the seat when the valve is opened and closed and the special design will avoid cone spin due to pulsation and vibration when the valve is in open position. A teflon tightening ring provides perfect sealing with minimum closing force.

Spindle

Made of polished stainless steel, ideal for leap seal sealing.

Packing gland

The low temperature packing gland ensures a perfect tightness. The packing glands are equipped with a scraper ring to prevent penetration of dirt and ice into the packing gland.

For special and/or high demanding applications/conditions which run with high constant temperatures, it is recommended to replace the packing gland with "HL Packing Gland" as spare part. For more information, please, contact your local Danfoss sales representative.

Installation

It is recommended that the valves be installed in the direction of flow indicated by the arrow on the valve body. The valve can be installed in the opposite direction but this slightly reduces the k_v-value (C_v-value).

Shut-off valve, type SVA-S and SVA-L, With butt-weld connection F

Figure 2: Example of Marking Ring

The valve is designed to withstand high internal pressure. However, the piping system in general should be designed to avoid liquid traps and reduce the risk of hydraulic pressure caused by thermal expansion. For further information refer to installation instructions for SVA.

Ordering

Available connection sizes

SVA-S:

The **S** means **Standard** bonnet length (sizes from DN50 to DN200 are insulation friendly).

SVA-L:

The **L** means **Long** bonnet length (insulation friendly).

Size	SVA-S	SVA-L
15	x	x
20	x	x
25	x	x
32	x	x
40	x	x
50		x
65		x
80		x
100		x
125		x
150		x

Type code

Valve type	SVA	Shut-off valve	
Nominal size in mm			Available connections
			F
(valve size measured on the connection diameter)	15	DN 15 (½)	x
	20	DN 20 (¾)	x
	25	DN 25 (1)	x
	32	DN 32 (1¼)	x

Certificates, declarations and approvals

The list contains all certificates, declarations, and approvals for this product type. Individual code number may have some or all of these approvals, and certain local approvals may not appear on the list.

Some approvals may change over time. You can check the most current status at danfoss.com or contact your local Danfoss representative if you have any questions.

Pressure Equipment Directive (PED)

SVA valves are approved according to the European standard specified in the Pressure Equipment Directive and are CE marked. For further details / restrictions - see Installation Instruction.

Table 35: Pressure Equipment Directive (PED)

SVA				
	Nominal bore	DN≤ 25 mm (1 in.)	DN32-80 mm (1¼ - 3 in.)	DN100 - 200 mm (4-8 in.)

Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at store.danfoss.com.

Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at www.danfoss.com/en/service-and-support/documentation.

Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at www.danfoss.com/en/service-and-support/learning.

Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: www.danfoss.com/en/choose-region.

Spare Parts

Get access to the Danfoss spare parts and service kit catalog right from your smartphone. The app contains a wide range of components for air conditioning and refrigeration applications, such as valves, strainers, pressure switches, and sensors.

Download the Spare Parts app for free at www.danfoss.com/en/service-and-support/downloads.

Coolselector®2 - find the best components for you HVAC/R system

Coolselector®2 makes it easy for engineers, consultants, and designers to find and order the best components for refrigeration and air conditioning systems. Run calculations based on your operating conditions and then choose the best setup for your system design.

Download Coolselector®2 for free at coolselector.danfoss.com.
