## CP521-21

Solenoid Valve, 3-way, 2-position, Spool Type

240 bar [3500 psi] • 60 l/min [16 US gpm]

### OPERATION AND DESCRIPTION

This is a 3-way, 2-position, spool type, direct acting solenoid valve. In the de-energized condition, port 1 is open to port 2 and port 3 is blocked. When energized, port 3 is open to port 1 and port 2 is blocked. These valves can be used in normally open, normally closed or selector modes. This valve has an open transition, which reduces pressure spikes when changing flow direction. Always check the operating envelope to make sure the valve will work under the required application conditions.
