# **Solenoid Valves**

# SV15-34-03

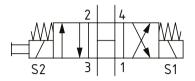

Solenoid Valve, 4-way, 3-position, Spool Type

230 bar [3300 psi] • 50 l/min [13.2 US gpm]

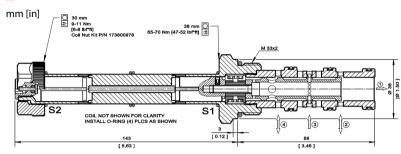

## OPERATION AND DESCRIPTION

This is a 4-way, 3-position, spool type, direct acting solenoid valve. In the center condition, all ports are open. By energizing one coil, port 3 opens to 2 and port 4 to 1. When energizing the other coil, port opens port 3 to 4 and port 2 to 1. This valve provides a directional control function with a neutral de energized state (all ports open). It can be used in any hydraulic application where an actuator needs to be controlled in both directions. Always check the operating envelope to make sure the valve will work under the required application conditions. Port 1 is not intended for use as inlet (Tank only)
