

Data Sheet

Gauge valve Type **SNV-ST** and **SNV-SS**

For servicing of heavy-duty industrial refrigeration applications

SNV stop gauge are designed as service valves with a very sturdy construction. SNV-ST are made in steel approved for low temperature operations, SVA-SS are stainless steel versions.

SNV-ST and SNV-SS are available in standard branch length configuration as well as extended branch configuration, with extension length versions from 50 to 150 mm.

Features

- Applicable to HCFC, non flammable HFC, R717 (Ammonia), R744 (CO₂) and hydrocarbons
- Suitable for "heavy duty" industrial applications including high pressures and wide temperature range
- The SNV-ST and SNV-SS valves have backseating (metal to metal)
- Compact and light valve for easy handling and installation
- No special flow direction required
- Provide high flow characteristics
- Each valve type is clearly marked with type and size
- Housing and bonnet material is low temperature steel (stainless steel for SNV-SS) according to requirements of the Pressure Equipment Directive and other international classification authorities
- Valve safety is enhanced with the spindle being secured such that it cannot be unscrewed
- Standard versions available with Max. operating pressure ranges (see [Ordering](#) section):
 - 52 bar / 754 psig Valves
 - 65 bar / 943 psig Valves
 - 140 bar / 2030 psig Valves
- Full temperature range:
 - **SNV-ST:** -60 – 150 °C / -76 – 302 °F
 - **SNV-SS:** -60 – 200 °C / -76 – 392 °F
- Classification: DNV, CRN, BV, EAC etc.

Portfolio overview

SNV-ST and SNV-SS offers numerous configurations and connections as well as versions for high-pressure applications, as shown in table.

Versions with different properties may be produced to order. Contact Danfoss for further information about made to order products.

Description	SNV-ST	SNV-SS
Configuration	Standard Extended branch	Standard Extended branch
Valve body/connection material	Steel	Stainless steel
Equipment	Cap Handwheel	Cap
Connection standard	ANSI/ASME B1.20.1 DIN 3861 DIN 3901 EN 10220 ISO 228-1 ISO 7-1	ANSI/ASME B1.20.1 EN 10220 ISO 228-1
Bottom branch connection type	Butt weld Cutting ring G NPT R	Butt weld Cutting ring G NPT
Side branch connection type	Cutting ring G NPT Rc UNF	Cutting ring G NPT
Special connections	Manometer connection	Manometer connection
Max working pressure [bar]	52 bar 65 bar 140 bar	65 bar
Max working pressure [psig]	754 psig 943 psig 2030 psig	943 psig
Packing format	Multi pack Industrial pack	Multi pack Industrial pack

NOTE:

Not all combinations are possible. For an overview over standard code number properties, refer to [Ordering](#) chapter.

Media

Refrigerants

SNV-ST and SNV-SS valves are currently authorized by Danfoss for use with more than 70 R-numbers HCFC, non-flammable HFC, Ammonia, CO₂ and hydrocarbons.

New refrigerants

Danfoss products are continually evaluated for use with new refrigerants depending on market requirements.

When a refrigerant is approved for use by Danfoss, it is added to the relevant portfolio, and the R number of the refrigerant (e.g. R513A) will be added to the technical data of the code number. Therefore, products for specific refrigerants are best checked at store.danfoss.com/en/, or by contacting your local Danfoss representative.

Product specification

Pressure and temperature

Table 2: Pressure and temperature data

Temperature range	SNV-ST: -60 – 150 °C / -76 – 302 °F SNV-SS: -60 – 200 °C / -76 – 392 °F
Maximum working pressure (see Ordering section)	Standard versions available with Max. operating pressure ranges: 52 bar / 754 psig Valves 65 bar / 943 psig Valves 140 bar / 2030 psig Valves

Design

Housing

Made of special steel, approved for low temperature operations

Spindle

Equipped with stainless steel spindle, which is ideal for O-ring sealing

Installation

No special flow direction is required. The valve is designed to withstand high internal pressures. However, the piping system in general should be designed to avoid liquid traps and reduce the risk of hydraulic pressure caused by thermal expansion.

For further information refer to installation guide for SNV-ST and SNV-SS.

*Packing format definitions

- Multi pack items can be ordered as 1 pc and up to the specified number of items pr multi pack. Each item is packed together with relevant documentation in individual packages.
- Industrial pack contains the number of items specified. Items are not individually packed and can only be ordered in pack quantity. Documentation is on pack level, not on item level.

Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at store.danfoss.com.

Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at www.danfoss.com/en/service-and-support/documentation.

Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: www.danfoss.com/en/choose-region.

Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at www.danfoss.com/en/service-and-support/learning.

Spare Parts

Get access to the Danfoss spare parts and service kit catalog right from your smartphone. The app contains a wide range of components for air conditioning and refrigeration applications, such as valves, strainers, pressure switches, and sensors.

Download the Spare Parts app for free at www.danfoss.com/en/service-and-support/downloads.

Coolselector®2 - find the best components for you HVAC/R system

Coolselector®2 makes it easy for engineers, consultants, and designers to find and order the best components for refrigeration and air conditioning systems. Run calculations based on your operating conditions and then choose the best setup for your system design.

Download Coolselector®2 for free at coolselector.danfoss.com.
