

See low-charge ammonia in a new light

NeoCharge offers a breakthrough in refrigeration technology, reducing ammonia charge while enhancing system performance. NeoCharge ensures seamless integration for both new and existing systems, promising optimal dependability and adaptability. Experience next-level connectivity and performance enhancement, transforming industrial refrigeration as you know it.

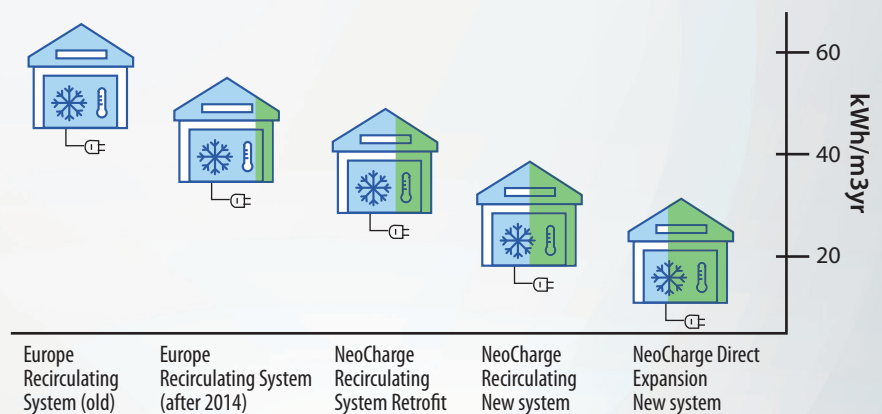

Charge saving potential with NeoCharge technology

This graphic illustrates how you can decrease your ammonia charge while maintaining the same cooling capacity.

Energy saving potential with NeoCharge technology

This graphic demonstrates the energy-saving potential of NeoCharge. The green color highlights the significant proportion of energy savings attainable with this solution.

Based on 100.000 m³ cold storage energy consumption.
