SKiM 270GD176D

SKiM® 5

IGBT Modules

SKiM 270GD176D

Features

- Homogenous Si
- Trench = Trenchgate Technology
- Low inductance case
- Isolated by Al_2O_3 DCB (Direct Copper Bonded) ceramic plate
- Pressure contact technology for thermal contacts
- V_{CEsat} with positive temperature coefficient
- High short circuit capability, self limiting to 6x I_C
- Vf value is specified on chip level
- Integrated temperature sensor
- Spring contact system to attach driver PCB to the auxiliary terminals

Typical Applications*

- AC inverter drives mains 575 - 750 V AC
- public transport (auxiliary syst.)

The specifications of SEMIKRON products may not be considered as guarantee or assurance of product characteristics ("Beschaffenheitsgarantie"). The specifications of SEMIKRON products describe only the usual characteristics of products to be expected in typical applications, which may still vary depending on the specific application. Therefore, products must be tested for the respective application in advance. Application adjustments may be necessary. The user of SEMIKRON products is responsible for the safety of their applications embedding SEMIKRON products and must take adequate safety measures to prevent the applications from causing a physical injury, fire or other problem if any of SEMIKRON products become faulty. The user is responsible to make sure that the application design is compliant with all applicable laws, regulations, norms and standards. Except as otherwise explicitly approved by SEMIKRON in a written document signed by authorized representatives of SEMIKRON, SEMIKRON products may not be used in any applications where a failure of the product or any consequences of the use thereof can reasonably be expected to result in personal injury.
