

DrivePro® 360Live

Achieve excellence with precision of maintenance

100% transparency to customer plants' installed base

With DrivePro® 360Live you will have 100% transparency to customer plants' installed base with continuous updates to drives lifecycle status, risks and criticality evaluation.

Customized dashboards

With DrivePro® 360Live tool, you will be able to customize dashboards and reports to forecast and schedule asset maintenance, repairs, retrofits, and emergency replacements.

You will have access to 24/7 plant overviews with detailed and intuitive dashboards. Transparency into your installed base data allows you to easily manage and monitor the lifecycle status of AC drives, providing an overview of maintenance needs to optimize reliability and performance across all your plants.

We help you endure efficient plant maintenance budgeting with reduced downtime and CAPEX costs. Danfoss is committed to being your partner throughout the entire lifespan of your products, and to provide you with data-driven expert recommendations.

DrivePro® 360Live

An installed base management solution to register and effectively optimize drives maintenance.

24/7

Plant overview with detailed and intuitive dashboards

Feature	Benefit
Smart and easy assets management tool	<ul style="list-style-type: none"> Maximize productivity by mapping assets' location, assessing risks, criticality, and creating maintenance schedules Allocate budget based on actual installed base data for optimal plant uptime Quickly access key files (e.g. parameter settings, service reports) to boost technical efficiency when handling servicing
Easy site maintenance management with preventive maintenance planning	<ul style="list-style-type: none"> Minimize unexpected downtime and increase installation uptime Optimize maintenance activities within budget by prioritizing critical assets Receive a customized maintenance plan generated by Danfoss experts
Discontinued drives series retrofit planning	<ul style="list-style-type: none"> Proactive retrofit proposals for discontinued drives in the customer installed base Embedded retrofit conversion tool for VLT® 2800 Drives (with more conversion tools to be added)
Easy to connect with Partner and Danfoss	<ul style="list-style-type: none"> Easily connect with your partner and Danfoss for immediate maintenance requests and support Access to Product Store for detailed technical documentation, including service manuals and spare parts catalogs
Emergency stock optimization	<ul style="list-style-type: none"> We will provide you with an overview of emergency stock drives matched with field units and your budget Reduce downtime and improve efficiency by stocking the right replacement drives
Comprehensive dashboards and reports	<ul style="list-style-type: none"> Dashboards with comprehensive overview of all your plants and assets data Individual fact-based reports with our expert recommendations of Asset Analysis, Preventive Maintenance Planning, and Emergency Stock overview
Intuitive web and mobile solution	<ul style="list-style-type: none"> Easily register drives available on laptop and mobile devices Possibility to use the tool online and offline

How it works

Request DrivePro® 360Live solution
Contact Danfoss local sales office by email or phone to request DrivePro® 360Live solution. We will connect you with the local project launch owner and schedule a meeting to introduce you to the tool.

Receive onboarding training
Danfoss experts will provide you with customized onboarding training based on your business industry and operational setup.

Get 100% transparency to your installed base status
Enjoy full access to our asset management solution and register drives for a customized maintenance strategy that fits your installed base needs. Danfoss will protect your data and provide regular updates to maximize equipment's efficiency and longevity.

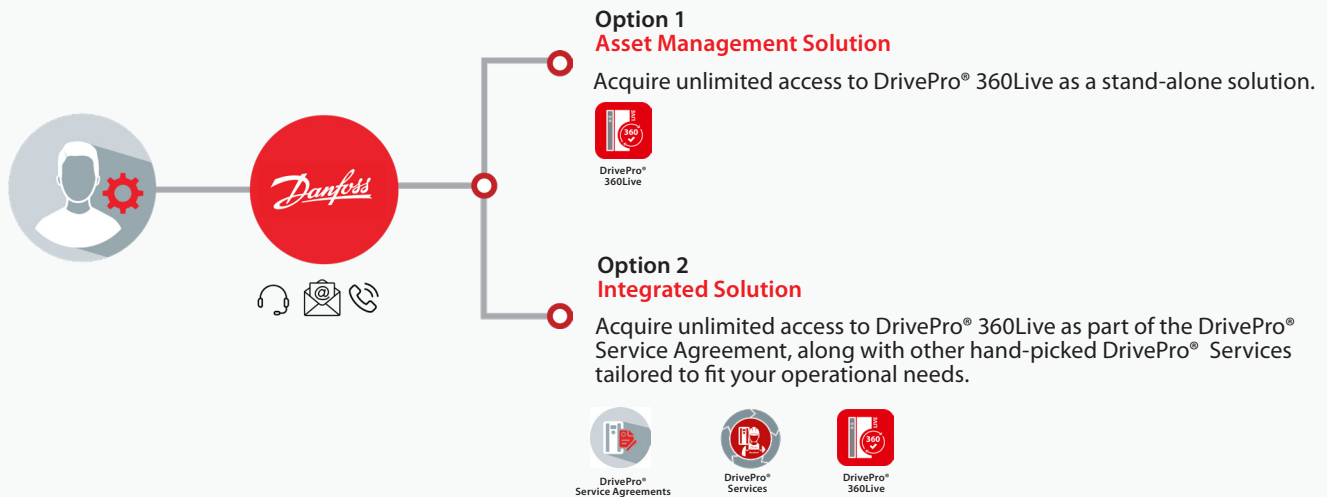

Ensure sustainable investment to plant management
Sit down with our experts to make data-driven plant maintenance decisions to secure equipment's reliability with an optimized maintenance budget.

Disclaimer*

The DrivePro® 360Live tool supports the execution of DrivePro® services by collecting necessary data about your AC drives' status, environmental conditions, and the applications they operate in. This data enables the generation of asset analysis reports, the development of maintenance plans, and suggestions for appropriate spare parts or replacement units.

Subscription Model

To request access to DrivePro® 360Live, please contact your local Danfoss sales office. You can place orders via email or telephone. Our team will provide an overview of the tool to help you make an informed decision among the available options.
