**NEW!**  
Intelligent thermostat  
for electric underfloor  
heating

**DEVIreg™**  
**Display Connect**  
Intuitive. Connected. Efficient.  
Easy to install. Easy to operate. Easy to use.

# Ready for installation. Ready for the future.

With quick installation, app-connection and energy-saving features – **DEVireg™ Display Connect** is the smart solution for modern homes.

# New Ecodesign requirements

From July 1, 2025, electric underfloor heating must be installed with thermostats that comply with Ecodesign regulation lot 20 (EU 2024/1103). The goal is to reduce environmental impact and support the green transition without compromising comfort and functionality.

**DEVireg™ Display Connect** meets the requirements – as do other DEVireg™ thermostats in our range, of course.

Install future-proof – without compromising comfort.
