

Shut-off ball valve

GBC (90 bar) / GBCT (140 bar)

For CO₂ application

Description

Danfoss shut-off ball valves, type GBC (90 bar), GBCT (140 bar) are manually operated shut-off valves for CO₂ refrigeration systems, in order to open and to shut off inner flow path by operating the valve spindle. The valves are specifically designed for intrinsic standstill security, meaning that the valves can withstand pressures normally arising when the refrigeration system is shut off, i.e. during serving or during unexpected power failure. The valve structure and materials are designed and tested specifically for use with CO₂ refrigerant. GBC (90 bar) valves are designed to use in subcritical CO₂ refrigeration systems. GBCT (140 bar) valves are approved for use in transcritical CO₂ systems.

Features & benefits

- GBC (90 bar)
 - Maximum working pressure: 90 bar / 1305 psig and applicable for subcritical CO₂ refrigeration systems
 - Bidirectional flow and relief design to prevent liquid entrapment when the valve is closed
 - Able to isolate both directions during service and sealing material especially for CO₂ to ensure long term product reliability
 - Stainless steel body with Cu-plated stainless steel tube - easy and fast brazing for systems with copper piping and available of access port version for 6s – 22s
 - Meet demand for lead-free and full RoHS compliance and UL/cUL Listed, complies with pressure equipment directive 2014/68/ EU
- GBCT (140 bar)
 - Maximum working pressure: 140 bar / 2031 psig and applicable for transcritical CO₂ refrigeration systems
 - Bidirectional flow and bleed hole design to prevent liquid entrapment when the valve is closed
 - Sealing material especially for CO₂ to ensure long term product reliability and version with reinforced copper-iron tube extensions to allow easy torch-brazing installation for systems with K65 piping
 - Version with stainless-steel butt welding connections, suitable for systems with stainless-steel piping and available of access port version for all sizes
 - UL/cUL Listed, complies with pressure equipment directive 2014/68/ EU

Applications

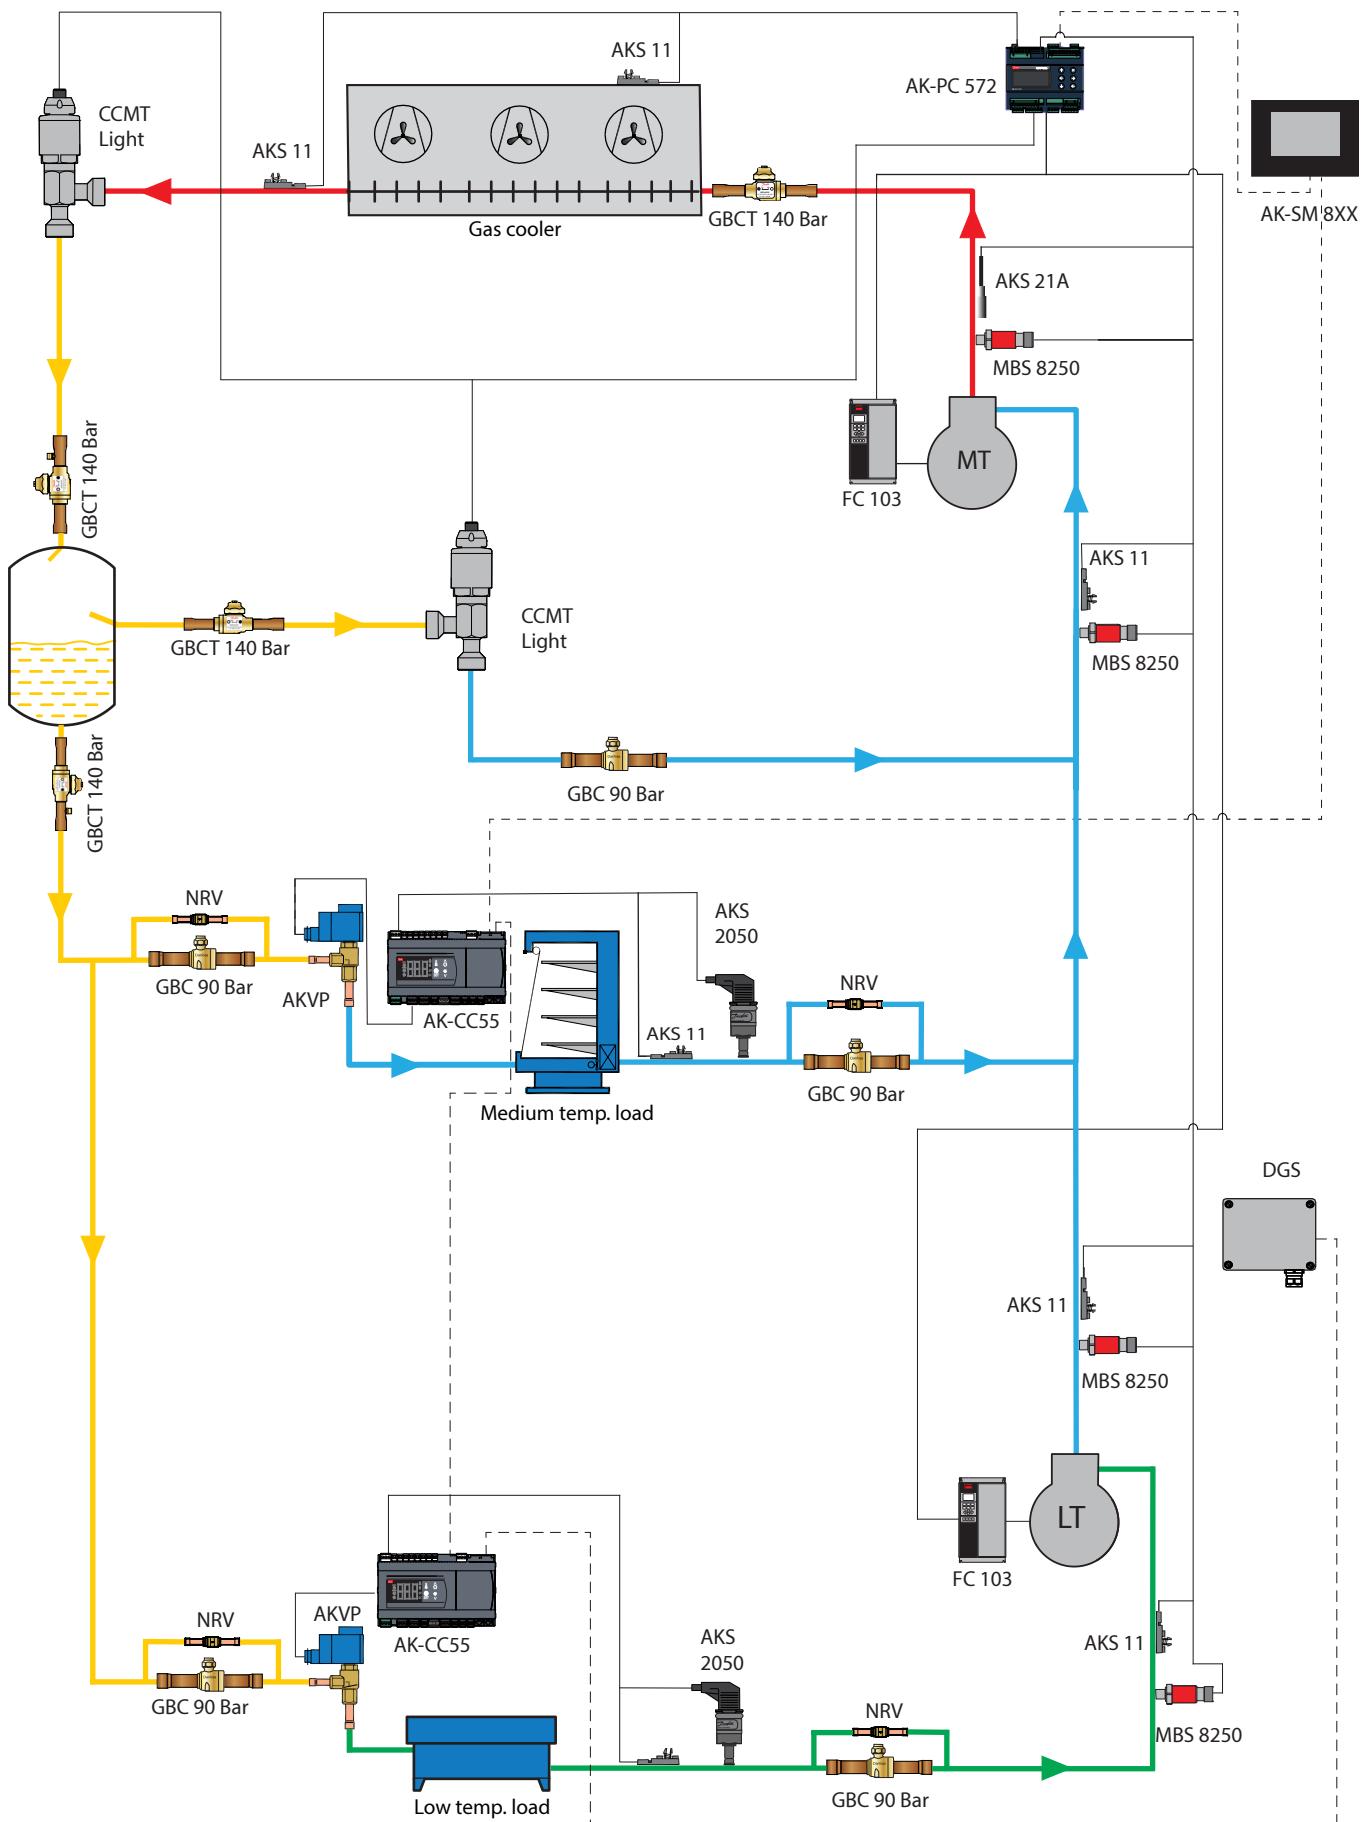

Typical applications for CO₂ ball valves are:

- Display cases
- Cold rooms
- Rack/Pack units

Danfoss CO₂ ball valves are designed for the following refrigerant cycles:

- GBC with PS = 90 bar, Cu-plated stainless steel connections equipped, for subcritical systems
- GBCT with PS = 140 bar, copper (K65) / stainless steel connections equipped, for transcritical systems

Figure: Application

—	HP High Pressure (120 – 140 bar)
—	HP Receiver Pressure (60 – 90 bar)
—	LP Suction Pressure MT (35 – 55 bar)
—	LP Suction Pressure LT (25 – 30 bar)

Refrigerants	R 744 (CO ₂)
Refrigerant oil	POE, PVE, PAG (Not compatible for mineral oil and PAO)

NOTE: For the application use with R744 as part of a secondary loop or cascade:

1. The design pressure of the refrigerant containing component is not less than the design pressure of the associated components.
2. The component is not provided with any pressure relief or pressure regulating relief valve and that a sufficient number of valves having capacity deemed adequate shall be field installed on the refrigeration system.
3. When the refrigeration system is de-energized, venting of R744 may occur through the pressure regulating relief valves, and may need to be recharged, but the valve should not be defeated or bypassed.
4. A sufficient number of pressure relief and pressure regulating valves may need to be provided based upon system capacity and located such that no stop valve is provided between the relief valve and the parts or section of the system being protected.

Product details

General data

Table: Technical data

Technical data	GBC	GBCT
Max. working pressure	90 bar / 1305 psig	140 bar / 2031 psig
Media temperature range	-40 – 100 °C / -40 – 212 °F	-40 – 149 °C / -40 – 300 °F
Flow direction	Bi flow	Bi flow
Isolation orientation during service	Bi-directional	Uni-directional (following GBCT instruction)
Environmental transport/storage temperature and humidity	-40 – 65 °C / -40 – 150 °F. Air humidity: RH≤95%.	

Mounting of GBCT:

Danfoss recommends that GBCT valves are installed so that the HP side is oriented towards the highest pressure side of the system when the valve is in the closed position. The ball valve will only internally seal in closed position when flow direction is from HP to LP.

Figure: Marking of GBCT

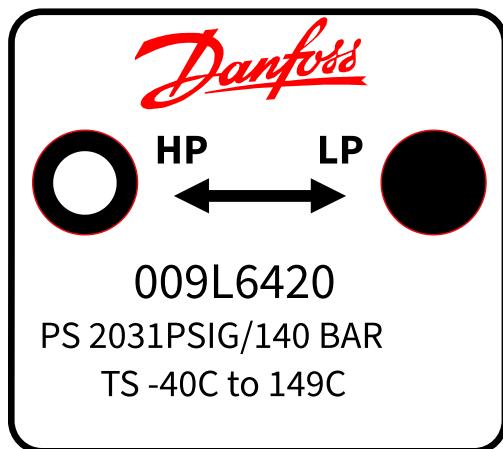

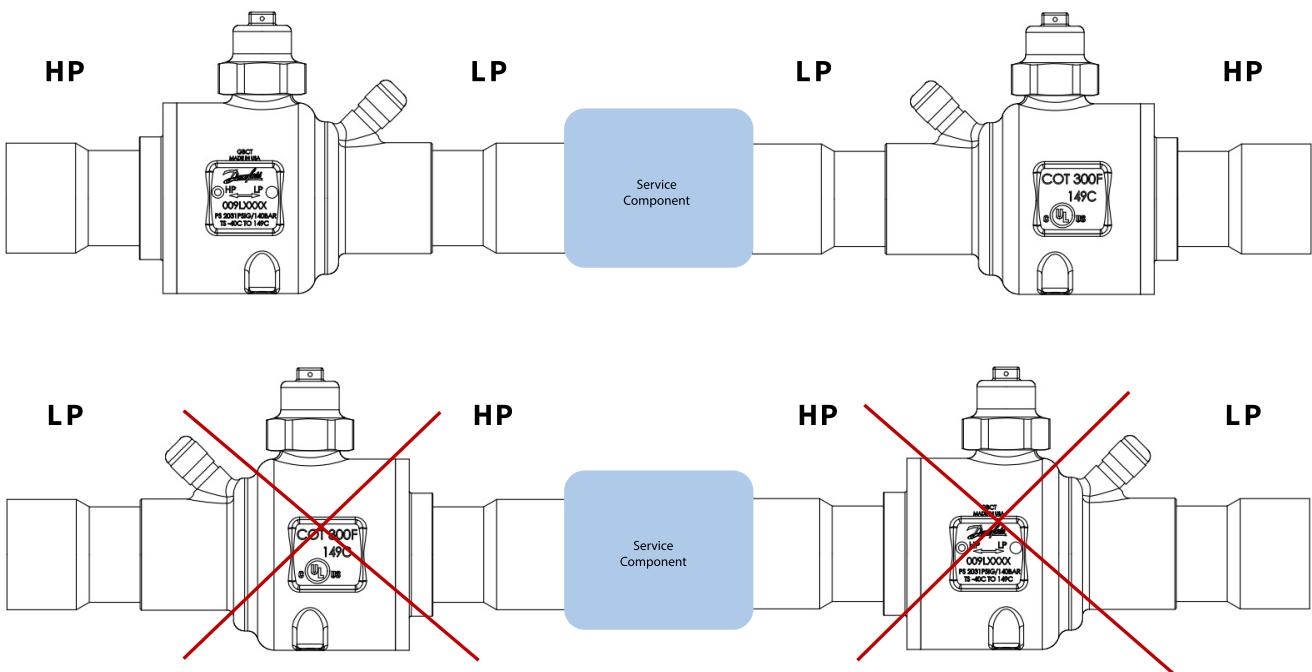

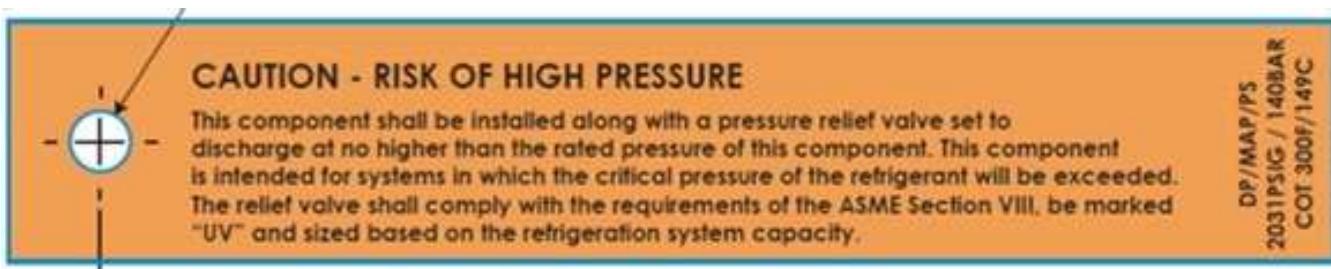

Table: Marking of GBCT

Inscription	Explanation
"HP"	Indicates where the bleed hole of ball is located and Danfoss recommends the HP side is oriented towards the highest pressure side of system when valve is in closed position.
"LP"	Indicates the side without bleed hole and shall be oriented towards to the low pressure side of system when valve is in closed position.

Figure: Flow direction for GBCT**GBCT CAUTION - RISK OF HIGH PRESSURE**

Do not close with CO₂ liquid temperature below ambient. This component shall be installed along with a pressure relief valve set to discharge at no higher than the rated pressure of this component. This component is intended for systems in which the critical pressure of the refrigerant will be exceeded. The relief valve shall comply with the requirements of ASME section VIII, be marked "UV" and sized based on the refrigeration system capacity. An orange hanging tag is added on all valves as per requirement of UL certificate.

Figure: Hanging tag of GBCT**Identification**

Relevant product data is available on the product and box label. An example of a box label and product label are shown, including an explanation of the content.

Design

Design and materials

Direct flow gives maximum through-flow with minimum pressure drop across valve. The combination of laser welded valve body (2) and valve tail (4), ball seat/seal (3), double O-ring seal in spindle (6), and cap seal (7) provides the best tightness.

Certificates, declarations and approvals

The list contains all certificates, declarations, and approvals for this product type. Individual code number may have some or all of these approvals, and certain local approvals may not appear on the list.

When you click on the link you will be directed to the latest version of the 'Declaration of Conformity'. Products developed and sold before this date of issue conform to the directives/standards in force at the time of their sale.

Approval type	Title	Certification body	Approval topic
Export Control Declaration	Check valve and Shut-off ball valve	Danfoss	
UA Declaration	Danfoss UA 2023-01-10 Ball Valves PL01	Danfoss	PED
Manufacturer's Declaration	Danfoss MD 033F4017.AD	Danfoss	
Manufacturer's Declaration	Danfoss MD 033F4003.AB	Danfoss	PED
Manufacturer's Declaration	Danfoss MD 033F4001.AK	Danfoss	PED
Export Control Declaration	Shut Off ball valve type GBC - Stainless Steel	Danfoss	
Pressure Safety Certificate	TSSA CRN 0C24058.5267890TNY	TSSA - Technical Standards & Safety Authority	Pressure
Pressure Safety Certificate	LLC CDC EURO-TYSK UA.TR.089.1015.04-22	LLC CDC EURO TYSK - Ukraine	PED
Manufacturer's Declaration	Danfoss MD 033F4010	Danfoss	EU RoHS
Manufacturer's Declaration	Danfoss MD 033F4006	Danfoss	China RoHS
EU Declaration	Danfoss EU 033F4013.AB	Danfoss	Pressure
UK Declaration	Danfoss UK 033F4052.AB	Danfoss	PED
Export Control Declaration	Check valve, Shut-off diaphragm valve, shut-off ball valve and differential pressure valve	Danfoss	

Contact details

Online support

Danfoss offers a wide range of support along with our products, including digital information, software, mobile apps and expert guidance. See the possibilities below.

The Danfoss Design center

Discover the Design Center, our advanced digital platform that streamlines product selection. With integrated tools and enhanced type pages, it's simpler than ever to access product information and documentation, and to select the right products. Check the availability of Danfoss products at partner locations and enjoy seamless transitions from selection to purchase with our basket-to-basket functionality. Whether you're buying from our distributors or directly from the Product Store, the Design Center simplifies your experience. Learn more at: designcenter.danfoss.com.

The Danfoss product store

The Danfoss Product Store is a one-stop shop available 24/7 for our customers, no matter where you are in the world or what area of industry you work in. Browse our catalog, check product details and documentation, view your prices and product availability, and quickly finalize your purchase. Start browsing at: store.danfoss.com.

Danfoss Partner Portal/Product Data tool

Designed to support you with easy access to product data extracts, essential resources, tools, and information. The Partner Portal provides a centralized hub for product documentation, training materials, marketing assets, and technical support, ensuring you have everything you need to succeed and grow your business with Danfoss. The Partner Portal is available 24/7 at: partner.danfoss.com and is ready to support your business.

Find technical documentation

Find technical documentation you need to get your project up running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more. Start searching now at: documentation.danfoss.com.

Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications industry topics, and trends that will help you do your job better. Find your local Danfoss website here: learning.danfoss.com.

Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert - all in your own language. Find your local Danfoss website here: danfoss.com.
