Designed for comfort and kind to your wallet

With the DEVIreg™ Opti digital timer thermostat, you will enjoy the pleasure of walking around on a floor that is heated to the perfect temperature, keeping you and your home nice and warm. In addition, the thermostat is also a delight to the eye thanks to its great design.

If you choose electric underfloor heating from DEVI you can have a system that complies to EcoDesign. The open window function and low standby consumption offer you comfort with minimum stress on your wallet. So, you will get a future-proof solution that ensures optimum energy utilization.

Fast and easy installation
Switch on, set time and day,
ready to use with
preprogrammed settings.

Install with confidence

The DEVIreg™ Opti timer thermostat is easy to install thanks to its preprogrammed settings. Besides the modern design, DEVIreg™ Opti comes with a range of features:

- Floor sensor, room sensor or room and floor sensor combined
- Inverted display
- PWM regulation
- Low standby consumption
- EcoDesign
- Programmable
- Display set point temperature (when operated)
- Display actual temperature
- Childproof (Safety lock)
- Battery back-up
- Open window detection
- Pre-Programmed
- Digital Timer
- IP21
- Floor temperature range 5-35°C (45°C with break out)

DEVIreg™ Opti comes preprogrammed from the factory. You only have to set time and weekday to get started. If you want to change the preprogrammed settings, it can easily be done in the installer menu (by an electrical installer).

DEVIreg™ Opti also comes with three preset timer settings. Time and temperature can easily be adjusted to fit different needs.
